

Day 4 coding Statement: Write a program to identify if a number is positive or negative

### Description

Get an input number from the user and check whether it is a positive or negative number.

Input : -10

Output : Negative number

Input : 0

Output : Neither positive nor negative

Input : 15

Output : Positive number

Code:

```
print("enter input")
ip =int(input())

if ip>0:
    print("The value is positive")
elif ip==0:
    print("The value is neither negative nor positive")
else:
    print("The value is negative")
```

Output:

```
enter input
-10
The value is negative
```

```
enter input
0
The value is neither negative nor positive
```

```
enter input
15
The value is positive
```
